

SAME PAGE LAYOUT AS TRADITIONAL AND STRETCH TENT HIRE PAGES PLEASE.

HEATING HIRE

Worried about being chilly at your event?

Warmth may be a concern when hiring a marquee with the often unpredictable English weather! We can offer interior heaters and patio heaters to keep your guests cosy at any time of the year.

We are able to offer two types of heating:

Indirect Diesel Heater Hire

These heaters are positioned outside the main marquee, with their own fuel cell. The hot air is then ducted into the marquee making your marquee snug and cosy. Our indirect heaters are supplied with a thermostatic controller, so that you can adjust the temperature to best suit your guests.

Brendon- Have you got this photo without the watermark? it is on the old website...

Pyramid real flame patio heater hire

These heaters are the perfect solution to your outdoor heating requirements. Supplied with a full gas canister, these heaters are as stylish as they are efficient.

Position these heaters at the entrance to your marquee to give that luxury five star feel for your arriving guests.
